Re: Leap's 3rd E911 Quarterly Report

Gentlemen:

Pursuant to the Commission's July, 2002 <u>Order to Stay</u>, Leap Wireless International, Inc. (and it Cricket Communications subsidiary) respectfully submits its third Enhanced 911 ("E911") quarterly implementation report for the period ending May 1, 2003. As described below, Leap has achieved a significant milestone during this period in launching its first "live" Phase II deployment in Wilson County, Tennessee on February 28, 2003. As you may be aware, Leap has recently filed a voluntary petition for relief under Chapter 11 but, despite our financial restructuring process, we continue to aggressively proceed with the E911 compliance and mandates.

1. Status of Pending Requests

As of April 30, 2003, Leap provided Phase I service to 155 PSAPs in 12 states. Leap is pleased to report that there are no pending Phase I requests that are older than six months.

No. of Capies recid 0+1

DC\549197.1

 $^{^1}$ See Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911, Order to Stay, CC Dkt No. 94-102 ¶¶ 28-30 (rel. July 26, 2002) (the "July Order").

Appendix A lists all pending Phase I and Phase II requests Leap has received as of April 30, 2003, including valid requests and those for which the PSAP lacks one or more prerequisites to their validity. We are currently working on 5 Phase I deployments and expect to meet the deployment date. We will continue to work on the remaining 32 valid Phase II requests and expect to meet the mutually agreed upon deployment dates.

2. Status of Phase II Deployment

As of April 30, 2003, Leap is proud to report that we are currently providing live Phase II service to 23 PSAPs in 2 states. As stated in the last quarterly report, Leap was concerned that it may not be able to complete Phase II deployment to all PSAPs by March 1, 2003. Therefore, Leap contacted each affected PSAP and was successful in obtaining consensus on 90 to 120 day extensions, as listed in Appendix A. Leap and their third-party service bureau went "live" with the First Office Application (FOA) in Wilson County, Tennessee on February 28, 2003. This allowed us to do the end-to-end testing and quickly move forward with other PSAP requests.

The PSAPs have been very cooperative and realize that E911 Phase II is a new technology. We have developed good working relationships with them and have been very proactive to resolve issues they would like addressed. For example, Leap found that PSAPs were unable to obtain Phase II data more than once. If the PSAP did a multiple rebid the data would revert back to Phase I. This would not allow the cellular phone user to be tracked if they were moving. Leaps' service bureau resolved this issue and the cellular phone user who is mobile could be tracked with multiple rebids.

3. Status of Handset Deployment

Leap began selling an ALI handset (Kyocera 2325 model) on June 30, 2002. On February 2003, Leap began selling the Motorola v120e model and is currently exceeding the May 31, 2003 benchmark of 25 percent of new subscribers activating service with ALI-capable handsets.

As required in the July Order, Leap is providing this implementation report to the Association of Public Safety Communications Officials (APCO), the National Emergency Numbering Association (NENA) and the National Association of State Nine One One Administrators (NASNA). If any recipient of this report should

have questions or comments concerning the information contained in the report, they should contact Laurie Itkin, Director-Government Affairs, at 858-882-6226.

Please note that I am an officer of Leap. Please note also that this notarized Report will, in accordance with the July Order, serve as an affidavit authenticating the facts set forth herein.

I swear under penalty of perjury that the facts set forth herein are true and correct to the best of my knowledge information and belief.

Glenn Umetsu

Senior Vice President— Engineering & Operations

^{*}Note: Leap has determined that originally on a statewide request there may have been certain PSAPs that were not Phase I ready. We have found that there are some PSAPs that are now Phase I and Phase II ready. We will be actively reviewing our maps and contact the appropriate PSAPs to begin appropriate deployments.
